

ReSorb

NIVA

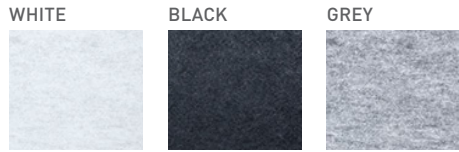

Give your space more structure. Create 3D relief designs with the ReSorb Niva modular system for walls and ceilings to give a unique architectural acoustic edge.

Panels are multi-directional squares which can be mounted both in a standard ceiling grid and on the wall. Niva panels are highly absorbent, designed to control reverberation (echo) in the room. Ideally suited for offices, conference rooms, canteens, restaurants, halls, and schools.

ReSorb Niva is available as a smooth finish of the core ECOSUND® material (white, black, grey, bronze brown Raw Edition), or a surface laminated finish from the Hush or Blazer textile range (the core edge will be seen).

ReSorb

NIVA

ReSorb Niva is manufactured as an easily mounted wall panel or as a ceiling tile to fit into standard grid systems.

DIMENSIONS: 593 x 593 mm
Depth varies across the surface from 30-90 mm

The core material ECOSUND® is visible from the side and available in four colours: white, black, grey, bronze brown. Made from 50% recycled PET material- bottles and containers and 50% new PET fibres it is manufactured responsibly without glue or adhesives to provide an anti-allergenic material (Oeko-Tex® Standard 100 approved). Environmentally responsible ECOSUND® is 100% recyclable.

ReSorb Niva core material ECOSUND® is a high-quality sound absorber. NRC rating class A- extremely absorbing. With standard fabrics Niva has been fire rated B-S1,D0. according to European Standard EN-13501-1
